Student Assistant (m/w) – Research Support

Location: Institute of Entrepreneurship, Technology-Management, and Innovation (EnTechnon), Karlsruhe Institute of Technology (KIT)
Duration: 6 months, extendable
Working Hours: 7-10 hours per week (28-40 hours per month)
Starting from: As soon as feasible

About the Role:

The Institute of Entrepreneurship, Technology-Management, and Innovation (EnTechnon) at KIT invites applications for a Student Assistant position to support research activities. This position focuses on exploring topics at the intersection of **entrepreneurship, digital health, business modelling, and medical software**, offering students a unique opportunity to gain hands-on experience in cutting-edge research.

This is an exclusive opportunity for students passionate about academic research to gain practical experience in literature analysis, data organization, and research development within a dynamic academic environment. You will contribute to research projects investigating critical issues such as the development of medical software, business modelling for startups, and strategic responses to global challenges.

Key Responsibilities:

- Conduct comprehensive literature research on specified topics.

- Organize, manage, and maintain bibliographic references using tools like EndNote, Zotero, or Mendeley.

- Summarize academic articles, reports, and other sources for research projects.

- Assist in drafting, editing, and proofreading research documents, presentations, and reports.

- Support preliminary data collection and analysis, as required.

- Collaborate with the research team to manage administrative and organizational tasks effectively.

en›techn›on

Required Qualifications and Skills:

- Enrollment as a student in a German university (KIT preferred) in a relevant field (e.g., Business, Management, Entrepreneurship, Economics, or related discipline).

- Strong interest in academic research, particularly entrepreneurship, and digital health.

- Proficiency in MS Office Suite (Word, Excel, PowerPoint) for document creation and data management.

- Excellent communication and organizational skills.

- Strong command of English (written and spoken).

What We Offer:

- Hands-on experience in academic research and project management.

- Exposure to cutting-edge topics and methodologies in entrepreneurship and digital health.

- Opportunities to gain expertise in using advanced IT tools for research, including data analysis software, reference management systems, and digital collaboration platforms.

- Opportunity to work on your own projects under support.

- A collaborative and stimulating academic environment.

- Flexible working hours tailored to accommodate your academic schedule.

Application Process:

To apply, please send the following documents to **sascha.weimar@kit.edu** by **April 23, 2025**:

- A cover letter highlighting your motivation and relevant experience.

- A detailed CV, including educational background and technical skills.

- Transcript of records (if available).
